

Link Touch application – Release notes

V1.0.7

- First official release

V1.0.8

- Optimized to display web pages making heavy use of widgets, it now increased compatibility with third party dashboards. Niagara dashboards and widgets are not affected by this fix and were working correctly also with V1.0.7

V1.0.9

- When displaying Niagara Alarm Console, the alarms sound was not played unless the screen was touched after the alarm occurred. Now the sound plays correctly without touching the screen

V1.0.10

- Adding a panel only works if the configuration password has been inserted (edit mode)
- Pinch zoom added
- Panel scaling general bug fixings

V1.0.11

- Adaptations to make pop ups for a customer dedicated hardware to work

V1.0.12

- Edit mode must be enabled to add a new panel
- Panel now does auto-scaling - also added view panel as desktop
- Always-auto login - limited to 3 attempts
- Setting-brightness, volume and sleep timer - application will ask for permissions to be able to change settings
- Keyboard - to change the keyboard to numpad I added the option to select it on the Add panel and Edit panel changes, also there is the option to change it while on the panel via the controls at the bottom of the page

V1.0.14

- Panel controls are now hiding after 10 seconds of inactivity
- Asking for permissions is done through a dialog for a better experience
- Sleep timer limited to values from 1-100 - minimum sleep time is 10 seconds
- Panel shouldn't be unresponsive after a long time of inactivity - android won't kill the activity anymore
- various code sanitization and improvements

V1.1.0

- fix for the panel continuously refreshing if network is disconnected and reconnected

V1.1.1

- Fixed bug for the sleep timer not setting the time at all because of a bad conversion
- Sleep timer value field is not automatically focused when navigating to settings page and sleep timer is on and has a set value
- Fixed bug when trying to login (type Niagara 4) if the user and password would be incorrect the webview would remember them and changing the user was no longer possible
- Settings password layout is now horizontal instead of vertical
- Added option to enable/disable forced responsiveness
- Added option to enable/disable panel zoom

V1.1.2

- Force responsiveness function enable text changed to “Link Touch Automatic Scaling”
- Zoom function enable text changed to “Pinch Zoom Gesture”

V1.1.6

- Added the option on the app settings to configure an “automatic reboot” either daily or weekly
- Corrected Innon address with the Epsom office address
